

IMAM MOHAMMED ELIMAM AHAMED

Software Engineer | Full Stack Developer | AI/ML Engineer

Riyadh, Saudi Arabia | +966 53-148 4519 | imammohammad777@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Full Stack Software Engineer with hands-on experience designing and building scalable web applications, RESTful APIs, and AI/ML-integrated systems. Proficient across the stack in JavaScript, TypeScript, Python, PHP, and Java, with React, Node.js/Express.js, and MySQL for production web platforms, and with Python, OpenCV, TensorFlow, and YOLO for computer vision and model inference. Experienced leading small development teams, architecting multi-tenant backend systems, optimizing databases, and deploying to Linux/VPS and containerized environments. Comfortable moving between full stack delivery and applied AI/ML work, collaborating with cross-functional teams, and working independently under deadline pressure.

TECHNICAL SKILLS

- **Programming Languages:** JavaScript, TypeScript, Python, PHP, Java, C++, Go, SQL, HTML5, CSS3
- **Frontend Development:** React.js, Tailwind CSS, Bootstrap, Vite, Responsive & Mobile-First Design
- **Backend Development:** Node.js, Express.js, PHP, RESTful API Design & Integration, Authentication, Server-Side Development, Microservices
- **Databases:** MySQL, PostgreSQL, Database Design & Optimization, Query/Index Optimization, Multi-Tenant Architecture
- **AI & Machine Learning:** Machine Learning, Deep Learning, Computer Vision, Neural Networks, Model Training & Inference, Data Preprocessing, TensorFlow, TensorFlow Lite, OpenCV, YOLO, scikit-learn
- **DevOps & Infrastructure:** Git, GitHub, CI/CD (GitHub Actions, Bamboo), Docker, CUDA, TensorRT, Linux Server Administration, VPS Management
- **Software Engineering Practices:** Full Stack Development, System Design, Software Architecture, Object-Oriented Programming, Data Structures & Algorithms, Agile/Scrum
- **Testing & QA:** Manual & Automated Testing, Unit Testing, Test Case Design, Bug Tracking, Quality Assurance

PROFESSIONAL EXPERIENCE

Founder & Full-Stack Developer | Self-Employed

Feb 2026 – Present

- Architect and develop a bilingual, multi-tenant SaaS platform for restaurant management, live with real and test users, including QR-code ordering, loyalty programs, analytics, authentication, and a drag-and-drop website builder.
- Design and build scalable RESTful APIs and backend services in PHP, implementing secure authentication and multi-tenant data architecture on a MySQL database layer.
- Build a responsive frontend with React, TypeScript, Tailwind CSS, and Vite, applying system design principles and clean, maintainable code under Agile practices.
- Administer Linux VPS infrastructure for hosting, deployment, and ongoing environment configuration.
- **Stack:** React, JavaScript, TypeScript, PHP, MySQL, REST APIs, Tailwind CSS, Vite, Git

Software Developer (Freelance) | Six Digit Club Sdn. Bhd.

Oct 2025 – Jan 2026

- Led a team of 4 developers delivering 2 full-stack web applications, coordinating tasks and communicating progress to stakeholders under client deadlines.
- Developed a Python-based AI-powered trading bot using Flask, integrating trading logic and data processing behind a backend API.
- Developed backend logic and RESTful APIs in Node.js, Python, and PHP (including CakePHP), and built frontend interfaces in React and TypeScript.
- Integrated third-party services and optimized MySQL queries through indexing and refactoring to improve performance.
- Designed UI/UX mockups in Figma, managed VPS infrastructure for deployment, and used GitHub for version control across the team.

Software Developer Intern | Six Digit Club Sdn. Bhd.

Jul 2025 – Oct 2025

- Developed backend services and REST API endpoints using Node.js, Python, and PHP (CakePHP), integrated with the overall system architecture.
- Built responsive frontend interfaces using React.js and modern JavaScript frameworks.
- Collaborated with cross-functional teams and communicated with stakeholders on requirements, task status, and blockers, using GitHub for version control.

Software Engineer (Part-Time) | Motorhome Holiday and Travels Sdn. Bhd.

Mar 2025 – Jun 2025

- Created system architecture diagrams and design prototypes to align stakeholders on project scope and priorities.
- Built a responsive frontend with React.js and jQuery, and implemented backend services with Node.js, following Agile methodology.

- Designed RESTful API infrastructure supporting communication between distributed services following microservice principles.
- Managed MySQL relational databases and optimized query performance through refactoring.

Software Engineering Intern | Motorhome Holiday and Travels Sdn. Bhd.

Jan 2025 – Mar 2025

- Built a full-stack web application from concept to deployment, covering frontend, backend, and database integration, including jQuery/AJAX-based UI interactions.
- Implemented CI/CD workflows using GitHub and Bamboo, automating unit testing and deployment pipelines, and managed feature branches and pull requests through code review.
- Applied Git version control best practices across the project lifecycle.

QA & Software Testing Engineer Intern | Mulah Technologies Sdn Bhd

Jul 2024 – Sep 2024

- Executed 200+ test cases and documented 50+ bugs, improving system stability by 20%.
- Validated database functionality and data integrity, and developed test plans and testing documentation.
- Collaborated with developers to prioritize and resolve bugs ahead of release deadlines.

KEY PROJECTS

AI-Powered Camera Security System (CCTV) — Academic / Personal Project

- Built a real-time surveillance system for face detection, recognition, and person tracking, using Python, OpenCV, TensorFlow, and YOLO with DeepSORT/ByteTrack for multi-object tracking.
- Implemented AI/ML models for age, gender, and demographic estimation, dress-code identification, and person profiling.
- Built a secure backend with Flask/FastAPI and JWT authentication exposing RESTful APIs, and a real-time web dashboard using React, HTML, CSS, JavaScript, and Bootstrap.
- Integrated RTSP streaming, WebSockets, and FFmpeg for live video processing, with MySQL/PostgreSQL for data storage and tracking.
- Deployed using Docker, Linux, CUDA, and TensorRT for GPU-accelerated inference, with Git/GitHub for version control.

AI-Driven Autonomous Robot — Academic / Personal Project

- Designed and built an autonomous robot that visually tracks a target person or object, carries items, and avoids obstacles in real time.
- Combined computer vision (Python, OpenCV, TensorFlow Lite) with LiDAR and proximity sensors for navigation and embedded motion control.
- Built a companion mobile app for remote monitoring and control.

Car Search Application

- Built a full-stack, mobile-first car search web application using React, Node.js, TypeScript, java, Microsoft SQL Server, and RESTful APIs, with workflows refined through usability testing and customer feedback.

EDUCATION

Bachelor of Computer Engineering (Honours) — MILA University

Mar 2022 – Feb 2026 | GPA: 3.3/4.0 | Coursework: Data Structures & Algorithms, Computer Networks, Operating Systems, Object-Oriented Programming, Artificial Intelligence, Programming Languages

- Dean's List Award — March & July 2024
- Golden Award — Projects Exhibition, 2024
- Second Place — Python Coding Competition

CERTIFICATIONS

- Full Ethical Hacking and Penetration Testing Course, Udemy (Mar–Jun 2023) — Ethical Hacking, Linux Administration, Web Shell Security, Database Security, SSL/TLS Protocols, HTTPS Implementation, Secure API Development
- AI For Good Workshop, AI Singapore (Mar 2025) — AI Prompting Skills, AI for Coding, AI Implementation in Software Development
