SUMMARY

Resourceful Software Engineer with experience in full-stack development, project leadership, and quality assurance. Proven ability to design and implement complex web applications, engineer robust backend logic using Python and PHP, and optimize database performance by 8%. Skilled in modern JavaScript ecosystems, RESTful API integration, and CI/CD workflows. Eager to leverage technical expertise and problem-solving abilities to drive innovative solutions and contribute to the success of a forward-thinking engineering team.

WORK EXPERIENCE

10/2025 – 01/2026	Software Developer & Project Lead (Freelance) SIX DIGIT CLUB SDN. BHD.	kuala lumpur , malaysia
	• Spearheaded a team of 4 developers in the design and implementation of 2 full-stack web applications. • Engineered UI/UX mockups using Figma and delegated development tasks to team members. • Formulated backend logic with complex mathematical implementations utilizing Python and PHP. • Leveraged the modern JavaScript ecosystem for frontend development. • Constructed and integrated RESTful APIs along with third-party services to enhance functionality. • Optimized MySQL databases managing 14 records, achieving an 8% reduction in query time. • Instituted version control with GitHub and managed VPS infrastructure.	
07/2025 – 10/2025	Software Development Intern SIX DIGIT CLUB SDN. BHD.	kuala lumpur, malaysia
	• Engineered backend services using Python and crafted frontend interfaces with React.js. • Architected backend services and API endpoints for streamlined processes. • Developed responsive web applications employing JavaScript frameworks and database technologies. • Collaborated with cross-functional teams using GitHub for effective version control.	
03/2025 – 06/2025	Software Engineer (Part-Time) MOTORHOME HOLIDAY AND TRAVELS SDN. BHD.	kuala lumpur, malaysia
	• Created comprehensive design prototypes and system architecture diagrams to guide development. • Developed a responsive website from the ground up utilizing modern web technologies. • Implemented backend solutions using Node.js while crafting the frontend with React.js. • Designed a scalable API infrastructure to support application needs. • Directed MySQL relational databases and fine-tuned query performance for enhanced efficiency.	

01/2025 – 03/2025	Software Engineering Intern MOTORHOME HOLIDAY AND TRAVELS SDN. BHD. - Developed a full-stack web application from initial concept through to deployment. - Constructed full-stack solutions leveraging the modern web development stack. - Built server-side integration layers to support frontend functionality. - Implemented CI/CD workflows utilizing GitHub and Bamboo for efficient deployment processes.	kuala lumpur, malaysia
-------------------	---	------------------------

07/2024 – 09/2024	Quality Assurance & Software Testing Engineer Intern Mulah Technologies Sdn Bhd - Executed over 200 test cases, identifying and documenting more than 50 bugs, thereby enhancing system stability by 20%. - Validated database functionality and preserved data integrity through thorough testing. - Drafted detailed test plans while maintaining accurate testing documentation. - Investigated and documented software bugs while collaborating with developers for resolution.	kuala lumpur, malaysia

EDUCATION

03/2022 – Present	MILA University Bachelor of Computer Engineering, (Honours) - CGPA: 3.3/4.0 - Relevant Coursework: Data Structures and Algorithms, Computer Networks, Operating Systems, Object-Oriented Programming, Artificial Intelligence, Programming Languages	nilai, malaysia
-------------------	---	-----------------

SKILLS

Java	Python
JavaScript	TypeScript
C++	PHP
Go	HTML/CSS
React.js	Node.js
Django	Java Spring
MySQL	Firebase
phpMyAdmin	Git
GitHub	GitLab
AWS	CI/CD
Bamboo	Slack
Linux	WordPress
Full Stack Development	RESTful API Design
Software Engineering	Cybersecurity
SEO	Figma
Manual Testing	Automated Testing
Quality Assurance	Test Documentation
Data Structures and Algorithms	Computer Networks

Operating Systems	Object-Oriented Programming
Artificial Intelligence	Programming Languages
Python	Computer Vision
AI/ML	Database Management
HTML	CSS
JavaScript	RESTful API
Team Leadership	Problem Solving
Technical Communication	Detail-Oriented
Self-Management	Adaptability
Project Planning & Management	Write and test code
Research, design, and write new software	Develop existing programs
Integrate software	Maintain systems
Consult clients	Modify existing software
Work with systems analysts	Work with sales professionals

LANGUAGES	English (Fluent)	Arabic (Native)

CERTIFICATES	Full Ethical Hacking & Penetration Testing Course Udemy	06/2023
