PROFESSIONAL SUMMARY

Full Stack Software Engineer with experience designing and implementing scalable web applications and RESTful APIs using React, Node.js, JavaScript and Python. Proven track record leading small teams to deliver responsive interfaces, architect features across frontend and backend, and optimize database performance. Skilled at rapid prototyping in response to customer feedback and collaborating across design, product and engineering teams.

PROFESSIONAL EXPERIENCE

SIX DIGIT CLUB SDN. BHD.

Software Developer (Freelance)

Oct 2025 - Jan 2026

- Led team of 4 developers in designing and implementing 2 full-stack web applications leveraging full stack software engineering best practices
- Designed UI/UX mockups in Figma and delegated development tasks to team members
- Developed backend logic with complex mathematical implementations using Node.js, Python, and PHP
- Utilized modern JavaScript ecosystem, including React and TypeScript, for frontend development
- Built and integrated scalable RESTful APIs and third-party services for enhanced functionality
- Optimized MySQL databases handling 14 records, reducing query time by 8%
- Implemented version control with GitHub and managed VPS infrastructure

Software Developer Intern

Jul 2025 - Oct 2025

- Developed backend services using Node.js and Python, and built frontend interfaces with React.js
- Architected robust, scalable backend services and API endpoints that integrated with the overall system architecture
- Built responsive web applications using JavaScript frameworks and database technologies
- Collaborated with cross-functional teams and communicated with stakeholders to gather requirements, using GitHub for version control

MOTORHOME HOLIDAY AND TRAVELS SDN. BHD.

Software Engineer (Part-Time)

Mar 2025 - Jun 2025

- Created comprehensive design prototypes and system architecture diagrams to align stakeholders on project structure and goals
- Developed responsive frontend website from the ground up using modern web technologies, ensuring clean syntax and maintainable code
- Implemented backend with Node.js and frontend with React.js, following Agile methodology across multiple sprints
- Designed scalable API (Application Programming Interface) infrastructure to enable seamless communication between microservices
- Directed MySQL relational databases and optimized query performance through refactoring and algorithm improvements

Software Engineering Intern

Jan 2025 - Mar 2025

- Developed full-stack web application from initial concept to deployment, handling both frontend and backend layers
- Developed full-stack solutions leveraging a modern web development stack, applying version control best practices via Git repositories
- Built server-side integration layers and APIs to connect application functions with the database
- Implemented CI/CD workflows using GitHub and Bamboo, automating testing (unit tests) and deployment pipelines, and managed feature branches and pull requests through structured code reviews

Mulah Technologies Sdn Bhd

Quality Assurance & Software Testing Engineer Intern

Jul 2024 - Sep 2024

- Performed 200+ test cases, identifying and documenting 50+ bugs, improving system stability by 20%
- Validated database functionality and ensured data integrity through rigorous testing
- Developed detailed test plans and maintained accurate testing documentation
- Identified and documented software bugs, working with developers for resolution

EDUCATION

MILA University

Mar 2022 - Feb 2026

Bachelor of Computer Engineering, Computer Engineering

- **GPA:** 3.3/4.0
- **Coursework:** Data Structures and Algorithms, Computer Networks, Operating Systems, Object-Oriented Programming, Artificial Intelligence, Programming Languages

CERTIFICATIONS

- **Full Ethical Hacking & Penetration Testing Course: Udemy | March 2023 - June 2023** Ethical Intelligence, Linux Administration, Web Shell Security, Database Security, SSL/TLS Protocols, HTTPS Implementation, Secure API Development
- **AI For Good Workshop: AI Singapore | Mar 2025** prompting skills, AI for coding, how to implement AI in developing a project.

TECHNICAL SKILLS

- **Programming Languages:** Java, Python, JavaScript, TypeScript, C++, PHP, Go, HTML, CSS
- **Frameworks & Libraries:** React.js, Node.js, Django, Spring Boot
- **AI / Machine Learning / Deep Learning:** Machine Learning, Deep Learning, Computer Vision, Neural Networks, Model Training, Data Preprocessing
- **Libraries/Tools:** TensorFlow, Keras, OpenCV, scikit-learn
- **Databases:** MySQL, Firebase
- **Tools & Technologies:** Git, GitHub, GitLab, AWS, CI/CD, Bamboo, Linux, WordPress
- **Software Engineering:** RESTful APIs, System Design, OOP, Data Structures & Algorithms, Full Stack Software Engineering
- **Testing & QA:** Manual Testing, Automated Testing, Test Cases, Bug Tracking
- **Soft Skills:** Team Leadership, Problem Solving, Technical Communication, Detail-Oriented, Self-Management, Adaptability, Project Planning & Management

AWARDS & ACHIEVEMENTS

- **Dean's List Award:** March & July 2024
- **Golden Award:** Projects Exhibition, 2024
- **Second Place:** Python Coding Competition

KEY PROJECTS

AI-Powered Camera Security System (CCTV)

- Developed an AI-powered CCTV surveillance system using Python, OpenCV, TensorFlow/PyTorch, and Computer Vision for real-time face detection, recognition, body detection, and person tracking. Implemented AI/ML models for age, gender, race estimation, dress code identification, and profiling using YOLO and DeepSORT/ByteTrack. Built a secure backend with Flask/FastAPI, JWT authentication, and RESTful APIs, and designed a web dashboard using HTML, CSS, JavaScript, Bootstrap, and React for real-time monitoring. Integrated RTSP streaming, WebSockets, and FFmpeg for live video processing, with PostgreSQL/MySQL/SQLite for data storage and tracking. Used Docker, Linux, CUDA, TensorRT, and Git/GitHub for deployment, optimization, and scalability.

Car Search Application

- Built a full-stack web application using React, Node.js, and TypeScript to enable users to search cars by make, model, and year
- Architected and consumed RESTful APIs in Node.js to efficiently retrieve vehicle data from multiple external sources
- Developed a responsive UI in React and TypeScript with intuitive navigation, incorporating customer feedback to refine user workflows
- Ensured cross-device compatibility through mobile-first design and conducted usability testing to validate seamless interactions

LANGUAGES:

- **Arabic:** Mother language
- **English:** Fluent
